

CLEAN, RENEWABLE, AND EFFICIENT ENERGY ACT (EXCERPT)
Act 295 of 2008

***** 460.1033 THIS SECTION IS REPEALED BY ACT 342 OF 2016 EFFECTIVE APRIL 20, 2017 *****

460.1033 Electric provider with 1,000,000 or more retail customers; obtaining renewable energy credits to meet standard in 2015; exception; submission of contract for approval.

Sec. 33. (1) Subject to subsections (2) and (3), an electric provider that had 1,000,000 or more retail customers in this state on January 1, 2008 shall obtain the renewable energy credits that are necessary to meet the renewable energy credit standard in 2015 and thereafter as follows:

(a) At the electric provider's option, up to but no more than 50% of the renewable energy credits shall be from any of the following:

(i) Renewable energy systems that were developed by and are owned by the electric provider. An electric provider shall competitively bid any contract for engineering, procurement, or construction of any new renewable energy systems described in this subdivision. However, an electric provider may consider unsolicited proposals presented to it by a renewable energy system developer outside of a competitive bid process. If the provider determines that such an unsolicited proposal provides opportunities that may not otherwise be available or commercially practical, the provider may enter into a contract with the developer.

(ii) Renewable energy systems that were developed by 1 or more third parties pursuant to a contract with the electric provider under which the ownership of the renewable energy system may be transferred to the electric provider, but only after the renewable energy system begins commercial operation. Any such contract shall be executed after a competitive bidding process conducted pursuant to guidelines issued by the commission. However, an electric provider may consider unsolicited proposals presented to it by a renewable energy system developer outside of a competitive bid process. If the provider determines that such an unsolicited proposal provides opportunities that may not otherwise be available or commercially practical, the provider may enter into a contract with the developer. An affiliate of the electric provider may submit a proposal in response to a request for proposals, subject to the code of conduct under section 10a(4) of 1939 PA 3, MCL 460.10a, and the sanctions for violation of the code under section 10c of 1939 PA 3, MCL 460.10c.

(b) At least 50% of the renewable energy credits shall be from renewable energy contracts that do not require transfer of ownership of the applicable renewable energy system to the electric provider or from contracts for the purchase of renewable energy credits without the associated renewable energy. A renewable energy contract or contract for the purchase of renewable energy credits under this subdivision shall be executed after a competitive bidding process conducted pursuant to guidelines issued by the commission. However, an electric provider may consider unsolicited proposals presented to it outside of a competitive bid process by a renewable energy system developer that is not affiliated with the electric provider. If the provider determines that such an unsolicited proposal provides opportunities that may not otherwise be available or commercially practical, the provider may enter into a contract with the developer. The contract is subject to review and approval by the commission under section 21. An electric provider or its affiliate may not submit a proposal in response to its own request for proposals under this subdivision. If an electric provider selects a bid other than the lowest price conforming bid from a qualified bidder, the electric provider shall promptly notify the commission. The commission shall determine in the manner provided under section 37 whether the electric provider had good cause for selecting that bid. If the commission determines that the electric provider did not have good cause, the commission shall disapprove the contract.

(2) Subsection (1) does not apply to either of the following:

(a) Renewable energy credits that are transferred to the electric provider pursuant to section 35(1).

(b) Renewable energy credits that are produced or obtained by the electric provider from renewable energy systems for which recovery in electric rates was approved as of the effective date of this act, including renewable energy credits resulting from biomass co-firing of electric generation facilities in existence on the effective date of this act, except to the extent the number of megawatt hours of electricity annually generated by biomass co-firing exceeds the number of megawatt hours generated during the 1-year period immediately preceding the effective date of this act.

(3) An electric provider shall submit a contract entered into pursuant to subsection (1) to the commission for review and approval. If the commission approves the contract, it shall be considered to be consistent with the electric provider's renewable energy plan. The commission shall not approve a contract based on an unsolicited proposal unless the commission determines that the unsolicited proposal provides opportunities that may not otherwise be available or commercially practical.

History: 2008, Act 295, Imd. Eff. Oct. 6, 2008.

Compiler's note: Enacting section 1 of Act 295 of 2008 provides: "Enacting section 1. As provided in section 5 of 1846 RS 1, MCL 8.5, this act is severable."
